

Name: Sonam Lama

Date: 6/26/24

s is the number of attempts before the account is locked.

n is the number of attempts.

if the user attempts the password, check to see if it is incorrect.

if the password is incorrect add one to n.

if the password is correct, the user is allowed into the account.

if the user doesn't attempt a password, check to see if n is equal to s.

if n is equal to s then the account is locked.
